The Together we (re)search Conference Committee

President: Yorick Koridon

Yorick Koridon is a third-year clinical psychology student, but this year he is also working as student member of the faculty board of the faculty of Social and Behavioural Sciences. He has been actively involved in both the honours programme and the study association. Yorick is the president of the Together we (re)search Conference committee.

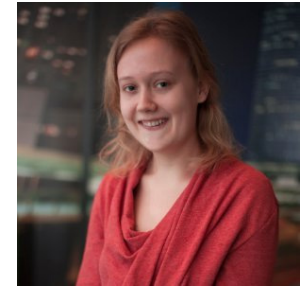

E-mail address: e.y.koridon@uu.nl

Head Speakers: Jet Klokgieters

Jet Klokgieters is studying interdisciplinary social sciences and will be starting her thesis now. In the past few years, she has been actively involved in the honours programme of the faculty and has been a student assistant at her own department, as well as the psychology department. Jet's activities in this committee revolved around finding and keeping contact with the speakers.

E-mail address: j.klokgieters@students.uu.nl

Vice President: Tim de Vries

Tim de Vries is fourth year BA-student and majoring in Interdisciplinary Social Science. Tim is student member of the Management Team of his programme and was involved in the external education review. As vice-president, Tim is involved with mailing contact, organizing weekly meetings with the Committee, and jumps in to help where needed.

E-mail address: t.d.devries@uu.nl

Vice Speakers: Martijn Martens

Martijn Martens is a third year sociology student who is currently writing his Bachelor's thesis about the emergence and evolution of negative triads in social networks. He is also an active member in the Promotion Committee Sociology, the Educational Committee Sociology and is actively involved in his study association Usocia. His main activities revolved around finding speakers and assisting Jet with her activities

E-mail address: m.martens@uu.nl

Secretary: Beatrijs Buijs

Beatrijs Buijs is currently studying Cultural Anthropology and is in her fourth year. The last years she studied (social) psychology and has been actively involved with her study association Djembé. In this commission Beatrijs is the secretary and her main activity is noting the minutes.'

E-mail address: b.buijs@students.uu.nl

Head Market: Marieke Rooze

Marieke Rooze is responsible for the Organizaion market. Marieke is currently studying psychology and is following a social and labour organisational psychology track. In our University, she would like to see more focus on creative thinking and creating your own plan to discover new insights, since she thinks this is very relevant for doing research. The main objective of this conference is nourishing your own creativity, and making it flourish!

E-mail address: m.e.rooze@students.uu.nl

Programme / Time Table

Time	Activity	Location
13:00	Doors open (with coffee and tea)	Room 1636
13:30-14:20	Keynote Speaker: Marcus Düwell	Atrium
14:30-15:20	Workshop 1:	
	Jaap Bos: Research Ethics - Plagiarism	Eijkmankamer, first floor
	Ellen Kok: Eye Tracking	Westerdijkkamer, first floor
	Félice van Nunspeet: Psychophysiological methods	Kernkampkamer, second floor
	Melle Smets: Where art and science create debatable futures	Opzoomerkamer, second floor
15:20-15:45	Break	Room 1636
15:45-16:35	Workshop 2:	
	Jaap Bos: Research Ethics - Falsifying Data	Eijkmankamer, first floor
	Ellen Kok: Eye Tracking	Westerdijkkamer, first floor
	Félice van Nunspeet: Psychophysiological methods	Kernkampkamer, second floor
	Melle Smets: Where art and science create debatable futures	Opzoomerkamer, second floor
16:35-16:55	Organization Market	Atrium
16:55-17:00	Plenary final words	Atrium
17:00-18:00	Organization Market and drinks	Atrium

Speakers

Keynote Speaker: Marcus Düwell

Marcus Düwell (born in 1962) holds a chair for philosophical ethics at Utrecht University. He is director of the Ethics Institute of Utrecht University and director of the Utrecht Research Institute for Philosophy and Religious Studies. From 2005-2012 he was director of the Netherlands Research School for Practical Philosophy. Düwell studied Philosophy, German Literature and Theology in Tübingen and Munich. His PhD-thesis at the university of Tübingen was a philosophical investigation about the relationship between ethics and aesthetics. From 1993-2001 he was academic coordinator of the Interdepartmental Center for Ethics in the Sciences and Humanities at the University of Tübingen.

Marcus Düwell is our keynote speaker and will talk about the role of science in Academia. The title of his keynote will be: "Why should creativity have a role in Academia?".

Workshop 1: Jaap Bos

Jaap Bos (1961) studied theoretical and historical psychology in Groningen and Utrecht. In 1997 he finished his PhD dissertation on argumentation and debates in the history of psychoanalysis.

In the first workshop we shall play the game of plagiarism. You will learn to become an excellent plagiarist and earn points for every time you succeed in getting away with 'stolen sentences'. However, you also become a good detective, and earn point for detecting plagiarism. The aim of this game is to become sensitive to the problem of plagiarism.

In the second workshop we discuss three real life case studies of 'falsifying data'. We follow students and researchers in their struggle with unwilling data (data that refuse to fit the model) and their quest for success. How to cope with the seductions of science? The aim of this workshop is to become sensitive to the various choices that must be made in the process of research.

Workshop 2: Ellen Kok

We tend to measure 'learning' by its outcome: a higher grade, a better test score. However, learning is more than an outcome, it's a process, it's about how we interact with learning materials. But learning processes are notoriously hard to measure, not the least because we tend to have trouble verbalizing them. Fortunately, more and more research focusses on process measures of learning, that aim to investigate the learning process and how it relates to learning outcomes.

In this workshop, I will provide a basic introduction into eye tracking, and show what kind of educational research is conducted with this technique. Furthermore, I'll bring a mobile eye tracker to show what an eye tracker looks like and how it works.

Workshop 3: Félice van Nunspeet

Félice van Nunspeet completed a Research Master in Developmental Psychology at Leiden University (2009), and graduated on a project about the neural underpinnings of social decision-making in adolescents. In 2014, she successfully defended her dissertation titled 'Neural correlates of the motivation to be moral'.

"In my research, in the field of social psychology, I examine people's motivation to adhere to moral group norms and their personal moral values. However, since people may not always be able or willing to report their attitudes about moral issues or intentions, I take a psychophysiological and neuroscientific approach to examine people's (implicit) behavioral tendencies and the cognitive processes underlying these inclinations. In this workshop I will let you experience such a behavioral measure and I will show you how measuring event-related brain potentials can tell us more about people's motivation to be moral."

Workshop 4: Melle Smets

The members of the Department of Search put their passion into developing cooperation between scientists and artists. From experience they understand its ins and outs, how mutual understanding works, and how this opens minds. Because of this, given an interesting set of circumstances, such as a university campus, they are capable of 'mining' whatever the inhabitants are taking for granted in their surroundings. There the Department is bound to find themes, ideas, questions and perspectives that will tickle everyone's imagination and evoke fresh universal interest. Doors will be opened, and new contacts will be established, new activities will deploy, on and off campus.

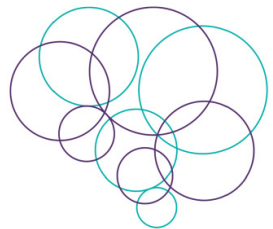

In this workshop, you will be challenged to think out of the box. How can artistic methods help you to get creative ideas? Zero Footprint Campus can help you enhance these ideas, and give structure to this process.
